Effective: December 22, 2020

Welcome to our new Mobile Phone App Online Home Banking site. We have been working on this for a while as a goal to dramatically improve Mobile Online and other e-Services for our Members.

New Mobile Apps:

A new Mobile Banking App is now available in the Google Play Store and the Apple Store for you to install on your Mobile Device (phone or tablet). Once installed, you will see a new experience with Mobile Banking at Gale Credit Union. Facial recognition and fingerprint ID will be available for those who choose enhanced secure method of signing into their Mobile Online.

What is coming soon:

- **Bill Payment Service:** We are continuing with our plan to convert to a new Bill Payment Service in later January.
 - Picture Pay will be included, allowing you the ability to simply take a picture of your bill and allow the system to automatically set up the Biller to pay the bill.
- **Portal Pay:** This will allow Member's to securely login from our Website to make a payment using a foreign Debit card – a feature many members have been asking for.
- **Enhanced Login Security:** Login credentials will now include improved multifactor authentication such as fingerprint and facial recognition to access your accounts Online.
- **Latest Security Systems:** Our Online Banking is now running on the latest security systems designed to protect your financial information and accounts.

We understand that sometimes change can be tough, but we are committed to working directly with you to get through these changes because the benefits and features on the other side are of great benefit to you.

As always, if you have questions, need help, or have a suggestion, please contact us at 309-343-1777 or in person in our office.
